Problem of the Week #10
## 100 Pound Potato Challenge

A Farmer grows 100 pounds of potatoes. The farmer sells them to a grocer who will put them into 5-pound bags and 2-pound bags.

What is one combination of bags the grocer could make
using all 100 pounds of potatoes?

Can you list **all** the possible combinations?

Show your work using pictures, numbers or symbols.

Example: The grocer could have ____ 5-pound bags and ____ 2-pound bags.

Name:_____Class:_____
